

How to delete your InkwellHealth.com account:

There are two ways to delete your account information when you are finished using the InkwellHealth mobile application:

- From inside the InkwellHealth application, go to settings and choose “Delete Account”
- Send an email to support@inkwellhealth.com saying that you would like to delete your account and provide your username

When you request account deletion, we will change your account to “inactive” and you will no longer receive messages or notifications from InkwellHealth. Your medical images will remain for your provider to access for as long as they require for billing and insurance purposes.
